

The NIME 06 installation spaces

Room 1 (size 4m x 4m or approx. 13 x 13 ft)

Room 2 (size 5m x 5m or approx. 16.5 x 16.5 ft)
(see plan in the folders "Room1" and "Room2")

These are two closed spaces at IRCAM's basement (level -1 and -2) in proximity to the NIME 06 conference spaces.

Stairs

(see plan in the folder "Stairs")

These stairs are leading from the basement of IRCAM's R&D and Production department (level -2: NIME 06 demos and posters) down to the Espace de Projection concert hall (level -4: NIME 06 paper sessions and concerts).

Entrance bridge

(see pictures and plan in the folder "Ircam-entrance_bridge")

This is the arched bridge leading to the entrance of IRCAM. The bridge connects the Stravinsky Place (see also below) with the entrance door and spans over the glass roof of IRCAM's basement.

External wall

(see pictures and plan in the folder "Ircam-external_wall")

The essentially empty (light beige) external wall of several levels belongs to the building extending IRCAM's facade to the left (south). Note that in June the sunset is around 10 pm and that the plaza is crowded. Also the beautiful Stravinsky Fountain by Niki de Saint Phalle and Jean Tinguely makes a considerable noise. Some people might play soccer!
